Roundstone Honored at 2016 US Captive Services Awards

Roundstone named Highly Commended Employee Benefits Consultant at US Captive Services Awards.

WESTLAKE, Ohio – Roundstone Management, Ltd. (“Roundstone”) is pleased to announce it has been Highly Commended in the Employee Benefits Consultant category at the 2016 US Captive Services Awards presented by Captive Review.

Held in Burlington, Vt. on August 8, 2016, the US Captive Services Awards were designed to recognize the achievements of companies in the captive insurance industry. Roundstone COO Matt Monda was on hand to accept the honor. “It’s great to be recognized among our peers,” said Monda. “The commendation from Captive Review is proof that we’re creating products that are in tune with employers’ needs.”

The award follows two of Roundstone’s recent market innovations that were outlined for Captive Review: Provider Sponsored Health Plans (PSHPs) and Voluntary Benefits.

- PSHPs connect employers directly to community health care providers while removing the costly traditional insurance layer.
- Roundstone’s Voluntary Benefits product is the first captive solution of its kind that makes supplemental coverage affordable to employees while allowing advisors and employers to reap the rewards expected from a captive.

“I’m grateful to our customers, our partners and our employees for making this commendation possible,” added Roundstone President Michael Schroeder. “The recognition reflects our day-to-day hard work and dedication to our mission of helping the middle market realize the value of captive solutions.”

Roundstone Management, Ltd. (“Roundstone”), based in Westlake, Ohio, is a family of companies that develops and underwrites innovative captive/self-insurance solutions for a variety of exposures, including health insurance, malpractice, voluntary benefits, transportation, warranty and workers’ compensation.
